

THE MICROSCANNER

BAR CODE
READERS

AMERICAN
MICROSYSTEMS

GENERAL INFORMATION

The **MICROSCANNER** bar code reader is a powerful compact keyboard interface unit capable of reading the most commonly used bar code symbologies in use today. The unit allows bar code data to be entered into a personal computer or terminal just as if it were typed in from the keyboard.

The **MICROSCANNER** works very simply because it plugs in-line with the keyboard. When the wand passes over the bar code, the computer or terminal thinks the information was typed in from the computer's or terminal's keyboard. **No** software changes are required.

The keyboard remains fully functional thereby enabling normal data entry.

The **MICROSCANNER** automatically recognizes and decodes the following bar code symbologies:

- CODE 3 of 9 (CODE 39)
- EXTENDED CODE 3 of 9 (FULL ASCII)
- INTERLEAVED 2 of 5
- UPC A/E
- EAN 8/13
- CODABAR

FEATURES

- ★ Bar Code data appears as keyboard input to personal computer or terminal.
- ★ Automatic discrimination between bar code symbologies.
- ★ Read HIGH, MEDIUM, and LOW density bar codes (including dot matrix).
- ★ Audible "BEEP" indicates successful scan.
- ★ Visual indication (LED) of successful scans.
- ★ No power cords or external power supplies are used (except Wyse 60 Model 600). The unit gets its power from the personal computer or terminal (just like the keyboard).
- ★ Low power CMOS technology.
- ★ Switch selectable options:
 - select keyboard type.
 - enable/disable each individual bar code symbology.
 - enable/disable audio "BEEP".
 - enable/disable a "carriage return" as the terminating character.
 - enable/disable display of UPC-A "NUMBER SYSTEM CHARACTER".
 - enable/disable internal "SELF-TEST/DIAGNOSTIC" routine.
- ★ EMI/RFI radiation coating.
- ★ ONE YEAR WARRANTY - PARTS & LABOR.
- ★ DESIGNED, TESTED, AND MANUFACTURED IN THE USA.

ACCESSORIES:

WAND

The hand held LED wand comes standard with the MICROSCANNER. The wand features a RUBY ball tip which glides smoothly preventing wear on repeatedly read labels. Rugged metal construction.

SLOT READER (or Badge Reader)

The Slot Reader can be used in place of the hand held wand enabling the operator to pass a badge, identification card, etc. through the slot. Rugged die cast metal construction.

WAND HOLDER

A durable, hard plastic holder for the hand held wand. Storage and retrieval is very convenient and improves operator efficiency.

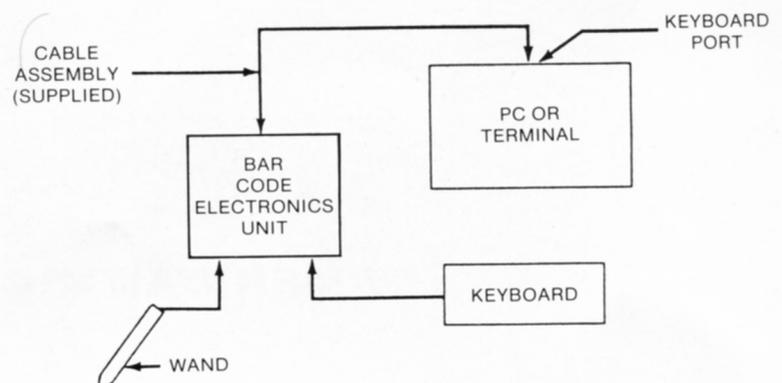

CCD READER

A self-scanning, noncontact and nonhazardous bar code reader which simplifies reading labels located on curved and uneven surfaces. The CCD reader offers a high read rate when scanning damaged, soiled, or laminated labels. Maximum label width 2.3 inches std., optional 4 inch.

SYSTEM INTERCONNECT

The following is a list of material that will be shipped with each unit:

- A. Bar Code Electronics Unit.
- B. Industrial Grade Metal Wand With Sealed Tip And Coiled Cable.
- C. Cable Assembly (connects between computer/terminal and electronic unit).
- D. Installation And Operating Instructions.
