

Panasonic[®]

Laser Partner[™]

***Move Your Business
Into The Laser Age***

DESIGNED FOR YOUR DEMANDING BUSINESS

NEAR-TYPESET QUALITY PRINTING

Give all your business documents the best possible appearance. With a high resolution of 300 dots per inch, the Panasonic Laser Partner prints text and graphics with virtually typeset clarity.

FASTEST IN ITS CLASS

Print letters, memos and reports at an amazing 11 pages per minute. This printer has a higher speed than any printer in its class, including many more expensive models.

PANASONIC FITS IN WITH YOUR SYSTEM

Five printer emulations make the Panasonic Laser Partner compatible with the most popular software. Plus two built in interfaces, one parallel and one serial, add plug-in convenience to compatibility.

More and more businesses are discovering the benefits of laser printing. It gives you the flexibility to print a variety of fonts with sophisticated graphics and more. All with a speed and resolution unmatched by other types of printers.

Panasonic has the laser printer that lets you take full advantage of these capabilities today. With a host of advanced features designed specifically for convenience and affordability.

So move into the laser age. With the Panasonic Laser Partner, there's never been a better time than now.

500 SHEET CAPACITY

Save time with the large paper capacity of the Panasonic Laser Partner. Two 250-sheet cassettes let you print 500 pages without adding paper. And the printer can handle two different sizes of paper at once, including envelopes.

HIGH RESOLUTION GRAPHICS

With 512K RAM standard, you have the ability to print graphics without having to add memory to the Panasonic Laser Partner. Or upgrade with options to 1.5MB of memory for full-page high-resolution graphics.

EXCEPTIONAL OPERATIONAL CONVENIENCE

Some printers use inconvenient dip switches to set print modes. The Panasonic Laser Partner puts all its controls right on the front panel, easily accessible to the user. The 15-character LCD displays messages — including error messages — in plain English. Print mode settings are simple to change. And the printer automatically defaults to its user-selectable "permanent" setting when each job is completed.

PANASONIC: THE SMART CHOICE IN LASERS

With a Panasonic Laser Partner, you can put virtually typeset-quality printing and laser speed at your fingertips. It gives you the advanced features you need for consistently excellent looking printed documents.

And Panasonic gives you all this at a price affordable enough for any size business. Plus you get the reliability built into all of our products. That

includes the confidence of knowing your Panasonic Laser Partner is running on a Panasonic engine.

Move up to the advanced capabilities of laser printing. Panasonic makes it easy with the high performance printer that's an excellent value, too. It's the perfect choice to bring your business into the laser age.
