# Curtain Call

Use Curtain Call for:
- Presentation Titling
- Video Paint
- Slide Show
- Sound and Music

Curtain Call:
Windows Multimedia
Presentation Program

Curtain Call makes it easy for you to produce professional presentations and videos featuring dazzling graphics, digital sound, and MIDI music.

Start with Windows graphics. Choose one of Curtain Call's designs, click your mouse, and Curtain Call will automatically create a rainbow of beautiful backgrounds. Put your artistic talents to work with Curtain Call's full-featured paint tools, or import graphics and clip-art from other sources. You can resize, rotate, cut, paste, recolor, and stencil to meet your specific requirements.

Transform fonts using gorgeous effects including shadows, outlines, metallics, 3D extrusions, anti-alias, strobes, and more. Simply type in your text. Curtain Call will automatically position it on the screen after applying your chosen effect. It's also just as easy to apply these effects to the clip art or shape of your choice.

Curtain Call's easy-to-use script editor will get the show rolling. Use your mouse to sequence images, choosing from dozens of slick variable speed transition and overlay effects. Preview any portion of the show at any time. With a supported sound board installed in your PC, you can record narration and sound effects along with musical accompaniment, and synchronize it with images. Whether you are controlling the show with your mouse, or letting Curtain Call take over, just sit back and enjoy.

It really is as easy as it sounds. Curtain Call's step-by-step tutorial manual and on-screen help menu will guide you.

Curtain Call is available from Brown-Wagh Publishing, your single source for PC-based sound, video, and animation products. 800-451-0900 (outside CA), 408-378-3838 (inside CA), 408-378-3577 (fax)
