

The #1 Clip Art in the  
World is Now Available in

**COLOR**

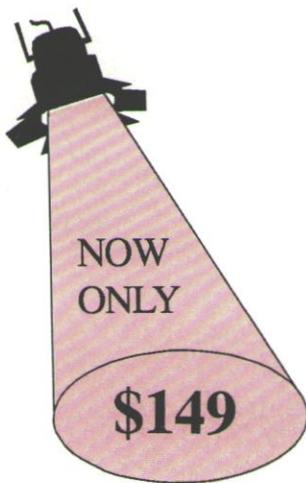

Introducing **PicturePak Pro**  
-- The Multimedia Art Library --

Over 1250 full color illustrations for creating animations, presentations, or published documents on your PC.

PicturePak Pro includes **CGM Express**, the color and file conversion utility that translates color & fill patterns to the native color palette of 15 leading graphic applications. So your color images will be as beautiful in your favorite word processor, printed in gray scale, as they are in full color in your presentation or multimedia graphics applications. **CGM Express** can also remove the color for high contrast printing, or to import into applications which do not accept color. In addition, **CGM Express** will convert your PicturePak color or B & W images to PCX files for applications which require bit-mapped images. These color PCX images are ideal for creating animations in all the leading multimedia products, such as PC Animator Plus, Storyboard Live!, Autodesk Animator, Ask Me/2000, and others.

And the price is unbelievable!

PicturePak Pro includes the:

**Eye Openers Series, 540 images**

Includes: Sales & Marketing, Management, Finance, and other business related images.

**USA Series, 540 images**

Includes: Federal, State & Local government images, as well as U.S. Maps & Landmarks.
